

FOR USE WITH D-SUB CONNECTORS

Positronic®
an Amphenol company

THE SCIENCE OF **CERTAINTY**®

M016 Rev A 21/03

Positronic®

an Amphenol company

Positronic builds premium power and signal connectors for a variety of industries. But every product delivers a single outcome: *Certainty*.

Driven by the mission-critical needs of our customers, we've gone to school on the subject for over 50 years. We approach it with scientific discipline – honing the fusion of raw material, engineering ingenuity, and precision manufacturing to push the next limits of reliability.

And with every new project, our curiosity is reignited. How will certainty be achieved in your system, with its own unique demands? The answers have graced the most formidable missions of our time, from the fires of super-sonic flight to the merciless scapes of Mars.

WHAT CAN YOU BE CERTAIN ABOUT?

- Rock-solid reliability
- Maximum design flexibility
- High efficiency, low heat performance
- Responsive, knowledgeable support

**THE SCIENCE
OF CERTAINTY®**

Custom Machined Aluminum Backshells Available!

Contact Technical Sales for details.

LIGHTWEIGHT ALUMINUM BACKSHELLS

This product has been designed for use in applications as a lightweight, EMI backshell for D-subminiature connectors. The features of the product are outlined below. Please contact technical sales for pricing and additional options.

GROUND SCREWS

- Sized and spaced for use with 6.35mm [.250 inch] diameter ring terminals
- Ground shelf height and ground screw length allow for stacking of ring terminals
- Holes are pre-tapped for ease of installation
- Ground screws are located outside the exiting wire path to facilitate wire routing
- Ground holes are tapped through to the outside which provide for optional external grounding

SPACIOUS INTERIOR

- Shape maximizes internal area which facilitates harness assembly
- No obstructions behind any portion of the connector body allows backshell to be used with Combo-D connectors

APERTURE / STRAIN RELIEF

- Appropriate for high density wire bundles using twisted, shielded pairs
- Cable clamps can be "spooned" to provide strain relief for small wire bundle
- Wide form factor allows the user to easily meet bend radius requirements

THUMB GRIP

- Grip facilitates installation and removal in tight spaces

LOCKING SYSTEM

- Available with jackscrews or quick disconnect locking device

TECH SPECS

MATERIAL AND FINISHES

Backshell & Cable Clamps Aluminum; aluminum with electroless nickel plate; aluminum with yellow anodize; aluminum with yellow chromate conversion. Zinc content is 1% maximum.

Jackscrews & Screws Steel with nickel plate; brass with zinc plate and chromate seal; brass, with 1.27µm min Au over Cu. Stainless steel options available, contact Technical Sales.

Actuation Lock System Steel with nickel plate

ELECTRICAL

Range of Operation, Calculated Method 2 GHz minimum.

MECHANICAL

Ground Screws Can accept up to 6.35mm [.250 inch] diameter ring terminal.

Locking System Jackscrews or quick disconnect locking device

ENVIRONMENTAL

Operating Temperature -55 to 125°C

WEIGHT CHART ^{*1}

Backshell Size	D ^{*2} 000ANVL Ounces [grams]	D ^{*2} 000ANE Ounces [grams]

G backshell 'low profile' shown with VL* option
*see page 20 for code 'VL' information

FEATURES

- Automatic rapid locking system keeps connection secure and is easy to unlock using the slide latch when needed.
- Gripping shoulders enable trouble-free extraction of the connector assembly, even with tightly packed aligned cable adapters.
- Cable adapters are designed with multiple entries and can permit the looping through of cables. Cable entries not used are sealed to maintain EMI/RFI shielding.
- Two height options are available, low-profile or an increased height option.

PART NUMBER	Shell Size	Backshell Height		A	B	Cable Exit Option	Cable Opening

^{*1} To prevent stripping of the backshell assembly screws, we recommend using pozidriv screwdriver bits available from stock using part number 9535-2-2-0, contact Technical Sales. For the mounting screws, we recommend using a standard phillips head screwdriver bit.

^{*2} These backshells are supplied with one (1) cable clamp set and one (1) opening plug. See page 13 for optional crimp Ferrule system.

^{*3} These backshells are supplied with one (1) cable clamp set and two (2) opening plugs. See page 13 for optional crimp Ferrule system.

ZINC, DIE CAST BACKSHELLS*1

For the sake of brevity, only basic dimensions are shown here. Full dimensional detail is available in the respective product drawings.

For use with code E

G (Low Profile)

Backshell, modular opening, zinc, die cast, EMI/RFI, low profile

G (Extended)

Backshell, extended height, modular opening, zinc, die cast, EMI/RFI

FEATURES

- Gripping shoulders enable trouble-free extraction of the connector assembly even with tightly packed aligned backshells.
- Rotating jackscrews offer the most secure mechanical locking of the connector system.
- Standard height backshells for use with connector shell sizes 1 and 2 are available with a top or side cable exit option. Contact Technical Sales for details.
- For use with connector shell sizes 3 - 5 are designed with three (3) cable entries and can permit the looping through of cables. Cable entries not used are sealed with supplied metal plugs to maintain EMI/RFI shielding qualities.
- Two (2) height options are available, one being a low profile option. An extended height option is offered for use with power conductors and coaxial cable, such as might be used with the Positronic CBD/CBM series connectors.
- Grounding to the backshells may be accomplished by fastening wires inside backshell with an M2.5 threaded Posidriv head screw.

*1 To prevent stripping of the backshell assembly screws, we recommend using Pozidriv screwdriver bits available from stock using part number 9535-2-2-0, contact Technical Sales. Standard height GE backshell use the Pozidriv style jackscrews.

*2 The extended height backshells use an internal hex jackscrew. Internal hex jackscrews are available for the standard height, but require an MOS.

*3 These backshells are supplied with one (1) cable clamp set and one (1) opening plug. See page 13 for optional crimp Ferrule system.

*4 These backshells are supplied with one (1) cable clamp set and two (2) opening plugs. See page 13 for optional crimp Ferrule system.

ZINC, DIE CAST ADAPTERS

For the sake of brevity, only basic dimensions are shown here. Full dimensional detail is available in the respective product drawings.

For use with code G backshell

GA (Adapter)

Backshell adapter, side opening, zinc, die cast, EMI/RFI

GA adapter shown

FEATURES

- Can be used as a gender changer which provides EMI/RFI protection.
- Allows for internal placement of a printed circuit board between the connectors.
- Can be used to adapt connectors of one interface standard to another.
- Used in applications where tapping into the electrical line path between connectors is necessary. A cable exit is provided for this application.
- If no connector is inserted into the rear side of the adapter backshell, the opening can be closed with a optional cover plate which can be adapted for use with LED's, mini-switches, and coaxial connectors. (Optional cover plate to be ordered separately)
- Jackscrew locking system is supplied as a standard for secure mechanical coupling.
- Grounding to the backshell may be accomplished by fastening wires inside backshell with an M2.5 threaded Pozidrive head screw.

PART NUMBER	Shell Size	A	B	Cable Opening		Optional Cover Plate	Optional Cable Opening Plug ^{*2}
				(Min)	(Max)

D37000GA0	4	82.50 [3.248]	63.50 [2.500]	3.00 [.118]	11.99 [.472]	A4589-37-0-0 ^{*3}	A4596-1-0-0 ^{*3}

^{*1} To prevent stripping of the backshell assembly screws, we recommend using Pozidriv screwdriver bits available from stock using part number 9535-2-2-0, contact Technical Sales.

^{*2} See page 13 for optional Crimp Ferrule System.

^{*3} Must be purchased separately.

CRIMP FERRULE SYSTEMS

For use with code G backshell

The crimp ferrule system can be used with all Positronic code “G” backshells and is recommended when maximizing EMI/RFI protection is desired.

The crimp ferrule system optimizes the transition of the cable shield into the cable adapter in three ways.

- It provides a low impedance connection of the cable shield to the cable adapter which remains constant over time.
- The system provides an EMI/RFI tight cable exit point.
- The system provides for high mechanical retention of the cable in the cable adapter.

Crimp ferrule (top left) and crimp flange (bottom right)

APPLICATION INSTRUCTIONS

Application of the crimp ferrule system is quite simple.

- #1 once the cable insulation and shield are cut to the correct dimensions
- #2 the crimp ferrule is placed over the cable and the crimp flange is inserted between the shield and the conductors
- #3 the crimp ferrule is now slid over the cable insulation into position over the crimp flange and the crimp is made using Positronic-supplied hand press and die sets
- #4 this assembly is then terminated to the connector and placed into the cable adapter
- #5 finally, the cover is placed on the cable adapter and secured using four (4) screws

To order the Positronic supplied hand press, request part number 9520-0-0-0 or for hand crimp tool, request part number 9521-3-0-0.

To order Positronic-supplied die sets, contact Technical Sales for ordering information, since die sets are customized based on the specific crimp flanges, crimp ferrules and cables used.

CRIMP FERRULE / FLANGE CREAT A PART

*1 Contact Technical Sales for part number completion which is determined by customer-required cable diameters and type.

METAL BACKSHELLS

Z6 backshell shown with male and female rotating jackscrews

Z7 backshell shown with female rotating jackscrews

COMPOSITE BACKSHELLS

For the sake of brevity, only basic dimensions are shown here. Full dimensional detail is available in the respective product drawings.

Y (size 50)*1

Backshell, composite, size 50, top opening, rotating male jackscrews

Y6 (size 50)*1

Backshell, composite, size 50, top opening, rotating polarized jackscrews

Note *1 Illustrations shown for Y backshell. The only difference for Y6 backshell will be jackscrew system and 'B' dimension.

Y (size 104)*1

Backshell, composite, size 104, top/side opening, rotating male jackscrews

Y6 (size 104)*1

Backshell, composite, size 104, top/side opening, rotating polarized jackscrews

Cable opening insert tree

Contact Technical Sales for availability of other size backshells

PART NUMBER	Shell Size	A	B	C	D
D50000Y00	5	51.94 [2.045]	38.02 [1.497]	67.44 [2.655]	19.66 [.774]
D50000Y600			30.08 [1.200] max.		
D104000Y00	6	51.08 [2.011]	26.04 [1.025]	71.88 [2.830]	21.29 [.838]
D104000Y600			25.04 [.986]		

JACKSCREW SYSTEM

T, T2, T3 or T7

CODE	Description	A	B
T ^{*3}	Fixed female jackposts, 4-40 UNC threads ^{*1}	11.10 [.437]	6.35 [.250]
T2 ^{*3}	Fixed female jackposts, 4-40 UNC threads ^{*1} , washer set	12.70 [.500]	5.03 [.198]
T3 ^{*3}	Fixed female jackposts, 4-40 UNC threads ^{*1} , washer set	20.65 [.813]	5.03 [.198]
T7 ^{*2 *3}	Fixed female jackposts, 4-40 UNC threads	10.92 [.430]	4.57 [.180]

E or E3

CODE	Description	A	B
E ^{*3}	Rotating male jackscrews, 4-40 UNC threads, slotted thumbscrews	16.43 [.647]	11.10 [.437]
E3 ^{*3}	Rotating male jackscrews, 4-40 UNC threads, internal hex, low profile	16.43 [.647]	11.10 [.437]

E2

CODE	Description	A
E2 ^{*3}	Rotating male jackscrews, 4-40 UNC threads, slotted, low profile	6.10 [.240]

^{*1} Internal thread length of T, T2 or T3 jackscrews is 3.05 [.120] nominal. Jackscrew supplied on connectors in combination with other accessories may differ dimensionally, contact Technical Sales for more information.

^{*2} T7 jackscrews supplied on connectors in combination with other accessories may differ dimensionally, contact Technical Sales for more information.

^{*3} T, T2, T3, T7, E, E2 or E3 passivated stainless steel jackscrews available. Contact Technical Sales for ordering information.

JACKSCREW SYSTEM - CODING DEVICE (KEYING)

T6^{*2}

Fixed female jackpost, fixed male jackscrew, 4-40 UNC threads

A	B	C	D
11.30 [.445]	5.59 [.220]	4.93 [.194]	11.07 [.436]

E6^{*2}

Rotating male jackscrews, rotating female jackpost, 4-40 UNC threads^{*1}

A	B	C	D
16.94 [.667]	3.84 [.151]	4.50 [.177]	17.60 [.693]

^{*1} For customer installations of knobs onto jackscrews, recommend set screw torque value of 16 in.-oz. Recommend application of thread lock to set screw.

^{*2} T6 or E6 passivated stainless steel options available. Contact Technical Sales for ordering information.

JACKSCREW SYSTEM - CODING DEVICE (KEYING) OPTIONS

UP TO EIGHT CODING DEVICE OPTIONS!

Jackscrews can be supplied in configurations to allow for up to four coding device options, as shown in the table. an additional four coding device options can be achieved by reversing the connector genders.

Option	Male Connector	Code (MOS)	Female Connector	Code (MOS)
1	2 male rotating	E * ²	2 female fixed	T * ²
2	2 female rotating	E6 * ² (-833.7* ³)	2 male fixed	T6 * ² (-866.1* ³)
3	1 female rotating* ¹ 1 male rotating* ¹	E6 * ²	1 male fixed* ¹ 1 female fixed* ¹	T6 * ²
4* ⁴	1 male rotating* ¹ 1 female rotating* ¹	E6 * ² (-1827.1* ³)	1 female fixed* ¹ 1 male fixed* ¹	T6 * ² (-1827.0* ³)

*¹ Additional options are achieved by switching male and female genders.

*² For dimensional information see page 19.

*³ To achieve keying option required, add MOS suffix '-833.7', '-866.1', '-1827.1' or '-1827.0' to end of final part number.

*⁴ Reverse polarized connector.

QUICK DISCONNECT LOCKING SYSTEMS

V3

Lock tabs, use with free cable or front panel mount connectors

PART NUMBER	Shell Size	A	B	C
D9/370000V30	1	6.86 [.270]	11.68 [.460]	6.91 [.272]

*1 Printed board mounting hole to be $\varnothing 3.12 \pm 0.08$ [.123 \pm .003] for use with boardlocks.
*2 Non-removable threaded hardware is built and inspected to 5in/lbs or 80 in/oz torque.

S7*

Standoffs, swaged, 4-40, boardlocks, for use with F ferrite inductor

Connector Series	Termination Code	A
MD, MDX, HDC, ODD	32, 33	9.53 [.375]
ED, HDC	36	
DD	32, 33	13.08 [.515]

SWAGED LOCKNUT

S5

Locknut, swaged, 4-40

*1 Non-removable threaded hardware is built and inspected to 5in/lbs or 80 in/oz torque.

SWAGED PLASTIC MOUNTING BRACKETS WITH ALIGNMENT BAR

Non-conductive mounting brackets are necessary in many applications.

Contact Technical Sales for more information

ANGLE BRACKET^{*1}

R

Angle brackets, swaged, metal with fixed female jackposts

R2^{*1}

Angle brackets, swaged, metal, alignment bar with fixed female jackposts

R3

Angle brackets, swaged, metal, clearance hole, Ø3.05 [.120]

R6^{*1}

Angle brackets, swaged, metal, clearance hole, Ø3.05 [.120], alignment bar

R4

Angle brackets, swaged, metal, 4-40 threaded hole

R7^{*1}

Angle brackets, swaged, metal, 4-40 threaded hole, alignment bar

R5

Angle brackets, swaged, metal, 4-40 locknut

R8^{*1}

Angle brackets, swaged, metal, 4-40 locknut, alignment bar

^{*1} Contact alignment bar is supplied with R2, R6, R7 and R8 options only.

FERRITE INDUCTOR BAR / BEADS

F

Ferrite inductor^{*1}

Q

Ferrite inductor^{*1},
for use with boardlocks and
right angle mounting brackets

Notes

^{*1} This bar option is available for connector layout options 9, 15, 25, and 37. Ferrite beads are used for the other sizes. Contact Technical Sales for ferrite inductor ordering information on those connectors.

^{*2} Specify Code F or Q when ordering. F is for ferrite inductor and Q is for ferrite inductor with boardlocks and right angle brackets.

FILTERING CHARACTERISTICS

FERRITE INDUCTOR AVAILABILITY

Termination Code	Series	A	L
32	MD, MDX, HDC	9.53 [.375]	6.10 [.240]

3.25 [.128]	7.78	1-3/4	10.01	2-1/4
3.20 [.126] Plated	7.78	1-3/4	10.01	2-1/4

BLIND MATE SYSTEM

Blind mating guide pins (MOS -759.0)

To obtain blind mating guide pins, add the suffix '-759.0' to the end of the part number.

Float mounting plate (MOS -759.1)

To obtain float mounting plate, add the suffix '-759.1' to the end of the part number.

Contact Technical Sales for additional ordering information

Shell Size	A (nominal)	B	C
1	49.02 [1.93]	17.20 [0.677]	40.28 [1.586]
2	57.35 [2.258]	17.20 [0.677]	48.62 [1.914]
3	71.25 [2.805]	17.20 [0.677]	62.51 [2.461]
4	87.53 [3.446]	17.20 [0.677]	78.79 [3.102]
5	85.14 [3.352]	20.04 [0.789]	76.40 [3.008]
6	87.53 [3.446]	21.59 [.850]	78.79 [3.102]

The use of blind mating hardware on D-Sub connectors can create functional challenges within the application and therefore requires additional mechanical design rigor. Be aware that system tolerances must be exact and mating force allowances may need to be higher than expected. Customers should qualify the use of this option in their particular application.

FLARED CONNECTOR HOUSING (SHELL)

Flared MOS-1503.33

Flared connector housing

Flared connector housings provide a more **generous misalignment** characteristics than standard D-subminiature connector housings.

Contact Technical Sales for part numbers and detail information.

Standard

Connector housing for reference

IN-LINE CRIMP SPLICE

Contact Technical Sales for crimp tool part number

PART NUMBER	WIRE SIZE AWG / [mm ²]	L	A	B
