

HAVOC SERIES

LOW-COST. HIGH-PERFORMANCE. MISSION-READY CONNECTIVITY.

PDS-386

DESCRIPTION

Engineered as a high-reliability, commercial alternative to industry standards such as the XT60 and XT90 Connectors, the HaVoc series delivers enhanced electrical performance, environmental protection, and supply chain assurance—optimized for both commercial drone platforms and NATO friendly defense applications.

HAVOC ADVANTAGE:

- **NATO-Friendly Manufacturing:** Produced in NATO-member countries to provide trusted sourcing, secure supply chains, and support for allied defense programs.
- **Sealed, IP-Rated Design:** Integrated interfacial seal and webbed grommet system supports environmental protection.
- **Low-Cost, Scalable Architecture:** Single-piece molded housing enables cost efficiency while supporting multiple contact sizes (16, 12, 10, 8) and configurations (1 & 2 pole options).
- **Mechanical Durability:** Designed to withstand vibration, shock, and repeated mating cycles in UAV and autonomous systems.
- **Flexible Mounting Options:** Features inline and flange-mount configurations for seamless integration across diverse platforms.

APPLICATIONS:

- Tactical UAVs (ISR, loitering munitions, small UAS)
- Commercial drones and eVTOL support systems
- Autonomous ground vehicles and robotics
- Battery interconnects and power distribution modules
