

# 8-CHANNEL ETHERNET SWITCH & COPPER-TO-FIBER MEDIA CONVERTER

PDS -292

## Amphenol introduces a new 10/100/1G Ethernet switch with four 10/100/1000-Base-T ports and four 1G capable fiber ports.

This converter switch can be used in harsh environment avionics, ground systems, or naval applications that need to transmit and receive such encoded interfaces over fiber optic cables.

### Stand-Alone Rugged 8-Channel Copper and Fiber Ethernet Switch

#### Part Number: CF-020011-32N

- Eight channel Ethernet Switch built around the Marvell Link Street 88E6390X device with support for four IEEE connections for copper Base-T and fiber optics which is 850nm multi-mode technology.
- Parts can be modified to support various platings, rotations, mounting provisions, modes of fiber, and different combinations of numbers of copper and fiber ports.
- Four channels of Base-T Ethernet come in on separate connector with Amphenol Octonet Contacts which support up to 10G-Base-T connections.
- Four channels of 850nm multimode fiber Ethernet come in on separate connector utilizing Amphenol CTF-Quadrax copper to fiber technology.
- 28V power comes in on separate standard 38999 connector
- -40C - +85C operating temperature and meant for military/commercial aerospace environments.

### Stand-Alone Rugged Four Channel Media Converter

#### Part Number: CF-020010-73N

- Same as -32N above, except there is no switch functionality. Ports are statically mapped from copper to fiber per the block diagram.
