

P3D – D38999 SERIES III

3D PRINTED INSERTS AND RAPID PROTOTYPING

Amphenol Aerospace is leading the charge on 3D printed inserts. Utilizing ground breaking in-house capability and industry leading partners, Amphenol can design and manufacture a custom insert assembly in days, not weeks.

INTRODUCING P3D-D38999 SERIES III:

- Performance comparable to D38999 (see table on page 2)
- No tooling required for new insert patterns
- Perfect for new design prototyping
- Low Risk – Easy to change designs if needed
- Currently available as a prototype unit only, production-certified units coming soon

AVAILABILITY:

- D38999 Series III available now with standard aluminum shells
- Ability to migrate design to other connector series
- Custom shells available, contact factory for availability
- Non-conductive composite shells available

PROTOTYPING:

From new design development to small quantities of engineering-built prototypes, PoC is enabling Amphenol to further assist our customers.

- Simple machining
- Part modification
- Assembly
- 3D printed fit-check parts
- Quick turn component sourcing
- Engineering design consulting
- Prototypes ranging from semi to fully functional parts

PERFORMANCE CHART

Test Requirement	Connector	
	D38999	P3D (Metal Shells)
Maintenance Aging	10 Cycles	5 Cycles
Temperature Cycling	-65C to 175C	-55C to 125C
Coupling and Uncoupling Torque	Equivalent	Equivalent
Durability	Equivalent	Equivalent
Altitude Immersion	Per D38999	N/A
Insert Retention	Equivalent	Equivalent
Shell To Shell Conductivity	Equivalent	Equivalent
Salt Spray	Equivalent	Equivalent
Electrical Engagement	Equivalent	Equivalent
External Bending Moment	Equivalent	Equivalent
Contact Retention	Equivalent	Equivalent
Insulation Resistance	Per D38999	Equivalent, up to 125C
Dielectric Withstanding Voltage	Per D38999	Equivalent, Sea Level Only
Accessory Thread Strength	Equivalent	Equivalent
Vibration	Per D38999	Per D38999, Ambient Temperature
Shock	Per D38999	Per D38999, Ambient Temperature
High Temperature Exposure	Per D38999	Up To 125C
Shell Spring Finger Forces	Equivalent	Equivalent
EMI Shielding	Equivalent	Equivalent
Pin Contact Stability	Equivalent	Equivalent
Contact Walkout	Equivalent	Equivalent
High Temperature Exposure w/ Loading	Per D38999	Up To 100C

CLASS DESCRIPTION

Military	Finish	RoHS	Material/Description	Typical Lead Time
RF	Electroless Nickel		Aluminum, 48 hrs. salt spray, 200°C	2-3 Weeks
RKN	Passivated Stainless Steel		Non-firewall capability, plus 500 hrs. salt spray resistance, 200°C	3-6 Weeks
RL	Stainless Steel with Nickel Plate		Corrosion resistant steel, 500 hrs. salt spray, 200°C	3-6 Weeks
RW	Olive Drab Cadmium		Aluminum, 500 hrs. extended salt spray, 175°C	2-3 Weeks
DT	Durmalon Plating		Nickel-PTFE alternative to Cadmium, 500 hrs. extended salt spray, 175°C	3-6 Weeks
DZ	Zinc-Nickel Plated		Zinc-Nickel Alternative to Cadmium, 500 hrs. salt spray, 175°C	3-6 Weeks

DESIGN YOUR OWN ARRANGEMENT

Contact Size	Test Current (AMPS)	
	Crimp	# Requested
22D	5	
20	7.5	
16	13	
12	23	
8	60	

Amphenol is pleased to offer an all new service, the ability for customers to design their own insert arrangement. Specify the number of conductors needed for each contact size, as well as the desired Service Rating (Default is M). Amphenol will get back to you with the shell size required to fit the contacts at your requested service rating, as well as a contact pattern designed with proper spacing and best engineering practices.

You can also receive a quote for the same custom arrangement in a standard D38999 molded insert, standard leadtime applies + additional lead-time for mold tooling design and manufacture

SERVICE RATING**

Service Rating	Suggested Oper. Voltage (Sea Level)		Test Voltage (Sea Level)
	AC (RMS)	DC	
M	400	500	1300 VRMS
N	300	450	1000 VRMS
I	600	850	1800 VRMS
II	900	1250	2300 VRMS

** Please note that the establishment of electrical safety factors is left entirely in the designer's hands, since they are in the best position to know what peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

STANDARD INSERT ARRANGEMENTS:

Please see Amphenol's D38999 Standard Catalog for available arrangements.

<http://www.amphenol-aerospace.com/pdf/catalogs/Amphenol-38999.pdf>

In most cases MIL-DTL-D38999 qualified connectors with standard arrangements can be purchased direct or through one of Amphenol's Distribution Partners (list below), however P3D is an excellent option for less common arrangements that may not be as readily available.

<http://www.amphenol-aerospace.com/distributors.html>

HOW TO ORDER- FOR AVAILABILITY REFERENCE ONLY

P3D D38999

Contact Product Manager with reference part number for a prototype, not available for standard quoting/purchasing process
